

HISTORY

Designed by Mogens Koch in 1928

Mogens Koch was the first architect in Denmark to make a flexible book case system for storage.

The first book case (76x76x27.5cm) was designed in 1928. At that time this kind of flexibility was truly revolutionary.

The solid wood storage system has been produced at Rud. Rasmussen since 1932.

DESCRIPTION

The Mogens Koch bookcase system is a true Danish design classic. It has been manufactured for 80 years, providing one of the most elegant and timeless storage systems in the world.

It is a true example of Danish craftsmanship at its very best.

The 2/3 bookcase is a rectangular, reversible book case with 4 sections.

It measures; 76cm x 50.6cm x 27.5cm (D).

It is also available as a deeper version of 36cm (D).

It is not possible to order any shelves for the 2/3 bookcase.

The bookcase can be wall hung, placed on other Mogens Koch units or be placed on bases.

When placed on a floor-base, the 2/3 bookcase can either be horizontally placed on a base nr. 1 or 2 or vertically placed on a 2/3 base nr. 1 or 2.

ENVIRONMENTAL INFORMATION

Carl Hansen & Søn and sustainability

People's fascination of the combination of good design and wood, as well as other natural materials, is something that transcends time and fashion. At Carl Hansen & Søn, we believe that this fascination helps to explain the great interest in our furniture, and we take very seriously concerns about the sustainability of the natural resources upon which we depend for our products. That is why we strive every day to improve our production methods, logistics and sales efforts in respect of scarce natural resources.

We buy wood only from sustainably managed forests. All sourced wood meets EUTR 2013 regulations, Danish Forest Legislation and current international certifications. Oak, beech and ash come primarily from Danish forests which are managed according to the principles described in Denmark's National Forest Programme; some of these wood types are also sourced from other similarly managed European forests, or, in the case of walnut and cherry, North American forests.

We use every possible bit of these fine hardwoods in our furniture production.

VARIANTS CHOICES AND DIMENSIONS

Inevitably, however, there are some scraps, which are then used to produce other products or recycled in district heating plants.
