

One New Flame

MORITZ WALDEMEYER, INGO MAURER UND TEAM 2013

At the upper end of a sleek circuit board, suspended on fine wires, a candle flame seems to flicker. Circuit board, metal, plastic.

Light source

Two displays each with 128 dimmable LEDs. 0,6 watts LED, 2700 K, CRI 80. With built-in LEDs. The light source is not exchangeable by the user.

Technical data

125 - 230 volts, secondary output 5 volts

More info

The electronic ballast is integrated in the simple, white canopy. On display only at our Munich showroom.

Colours

Circuit board available in black or red
