

BERENICE 360 chair

R | O | D | A

Design

Studio Altherr Lievore Molina

Description

Chair for outdoor use

Structure

Powder coated steel cleaned and treated with an electrolytic process of hard iron phosphatisation. This pre-painting guarantees a higher resistance to corrosion and it removes polluting substances. Its effect is reinforced with a following nanotechnology anticorrosive treatment and with an electrostatic powder painting with polyester base that gives more protection from scratches and also the final coloring to the product.

Belts

Double-twisted 100% polyester thread, in cotton finishing; they have great toughness and great resilience, high resistance to abrasion, to heat, to bending stress, high modulus of elasticity, minimal wet regain, good resistance to chemical agents and to bad weather conditions; color fastness to light of 7 in the blue scale (maximum: 8); as the time goes by, the exposition to extreme weather conditions may cause a discoloration of the threads.

Leather

Full grain leather of European cow hides, aniline-dyed and treated in baths which confers its peculiar hydro-repellence. It has a color fastness to sunlight of 3 in the grey scale.

Weight

Woven chair 7 kg; leather chair: 11 kg

Maintenance

Steel

In case of exposition to weather conditions, it is recommended to wash regularly the product with mild tepid water. In case cleaning is needed, use a neutral soap (UNIVERSAL CLEANER by RODA) and warm or mild water. Dry immediately to avoid stains and halos caused by water.

Eventual rusty formation must be treated with a rust stopper and eventually touched up with the paint stick in the same color of structure, supplied by RODA.

Belts

Brush the surface or treat it using water and neutral soap (UNIVERSAL CLEANER RODA). Do not use any abrasive products, acid substances or aggressive chemical solvents.

Leather

For an ordinary cleaning, dust with a soft and dry cloth. Any stain can be treated with a wet cloth or absorbent cotton and delicate products, such as neutral soap or cleansing milk (UNIVERSAL CLEANER RODA).

Dry immediately after the treatment.

Do not scrub the surface but tampon from the edges to the centre of the stain.

Do not use abrasive products, solvents, stain removals, and so on. In any case, every time you are using a new cleaning product, before using it, try it in a hidden part to verify its efficiency and its no-damaging effect.
