

HISTORY

As the son of Jørgen Kastholm, Thomas Bo Kastholm was born into a family that lived for furniture design.

Thomas Bo Kastholm followed in his father's footsteps, studying design at the Danish Design School. He has worked for studios in both Denmark and Germany.

Cooperation between Carl Hansen & Son and Thomas Bo Kastholm began in 2009 with the introduction of the TK8 Daybed.

DESCRIPTION

The TK8 daybed has a sleek and straightforward appearance combining leather, wood and stainless steel at its best.

The daybed is ideal for public areas such as airports, and museums, but has also been used in private homes with great success.

The Daybed can be equipped and bolted to the floor which is recommended in public areas. For private usage this is not necessary.

There is an optional pillow available for both sizes of the Daybed.

Made from Steel Chrome, wood and cold foam. Upholstered in the customer's choice of leather.

ENVIRONMENTAL INFORMATION

Carl Hansen & Søn and sustainability

People's fascination of the combination of good design and wood, as well as other natural materials, is something that transcends time and fashion. At Carl Hansen & Søn, we believe that this fascination helps to explain the great interest in our furniture, and we take very seriously concerns about the sustainability of the natural resources upon which we depend for our products. That is why we strive every day to improve our production methods, logistics and sales efforts in respect of scarce natural resources.

We buy wood only from sustainably managed forests. All sourced wood meets EUTR 2013 regulations, Danish Forest Legislation and current international certifications. Oak, beech and ash come primarily from Danish forests which are managed according to the principles described in Denmark's National Forest Programme; some of these wood types are also sourced from other similarly managed European forests, or, in the case of walnut and cherry, North American forests.

We use every possible bit of these fine hardwoods in our furniture production. Inevitably, however, there are some scraps, which are then used to produce other products or recycled in district heating plants.
