

Large dining table.

Both the **top** and the two support acting as the table **base** are moulded in Lias, a mixture of limestone and clay decorated with a modern mosaic of ceramic fragments in predetermined color combinations.

The **top** is made more stable and solid by an aluminum honeycomb panel inserted in its thickness during the moulding phase.

The element forming the table **base** have inside a steel structure allowing the coupling of the top without visible coupling elements and are provided with adjustable stainless steel and rubber spacers.

Concreto is available also in Graniglia, the same mixture of limestone and clay but without ceramic decoration.
