

Side table available in two heights.

Base: extruded majolica elements.

Top: round and transparent, made of glass fusion.

Notes:

The elements composing the base are crafted and decorated by hand in exclusive colours by Nicolò Morales; they are positioned according to a pre-established scheme.

The elements, with different shapes and dimensions, have a core in matt-varnished stainless steel AISI 316. The core is glued to the top, the plastic spacers hold the majolica elements in place.

This product can be used also in interior environments.

We advise to use a Winter Set protection cover.
