

Reality  
THEO MÖLLER 2023

Delicate, fragile and yet astonishingly effective. The egg and its special shape have always had a special place at Ingo Maurer. Discover Reality, the new lamp made from a real egg. The centrepiece of the luminaire is a real, certified hen's egg, into which a fine geometric slit is cut. The LED, which is suspended with copper cables, provides gentle lighting with just nine lumens. But its true beauty lies in this restraint.

**Light source**

With LED 6 V, 0.3 W, socket E5.5. USB connection type A 2.0; voltage max. 6 V.

**More info**

Connect the USB plug (type A 2.0) to a suitable power source: a USB power supply unit, computer or a power bank with a maximum output voltage of 6 V. The light source is not part of the EU Ecodesign Directive and can be replaced by the user. Power supply unit not included in the scope of delivery.

**Colours**

Real egg. Eggshell, white, copper.
