

Seating platform with central backrest composed of long shaped and independent cylindrical elements.

The **platform padding** is made of recyclable expanded polyethylene mixed with Aerelle® blue polyester fiber and a layer of recyclable polyester, encased in a fixed cotton covering.

The **upholstery** is removable and composed of different indoor fabric offcuts that would otherwise remain unused.

The long, shaped elements acting as backrests are fixed but can freely move.

The **backrests padding** is made of recyclable expanded polyethylene mixed with Aerelle® blue polyester fiber encased in a fixed covering in cotton fabric.

The **upholstery** is fixed and made of an elastic tubular knit, produced with polyester yarns remained from the weaving of the indoor fabrics in the collection.
