

Offcut Stool

Constructed from off cut pieces of wood normally discarded in standard furniture production. Its construction requires no additional screws or glue as it uses the old method of pegs and tenons. It arrives flat packed and is easy to assemble. Available in natural, black or fluoro RAL 2005 finish.

Process	Made from the waney edge of a piece of wood (an irregular piece found next to the bark). The natural version is made from oak and treated with a traditional method of finishing wood. The fluoro version is made from birch with a RAL 2005 finish.						
Year of Design	2013						
Material	Oak (Natural), Birch (Fluoro & Black)
