1/2

Passage is a multi-purpose word. It can be found in many spheres, from travel to literature and music. It suggests movement, fluidity and transition from one place to another. The Passage collection is no less versatile.

The Passage chair is composed of a soft and fluid aluminium structure, where slides over a backrest made from a single piece of extruded aluminium. The seat can be made from a single piece of aluminium, but it can also be made from wood, fabric, rope, webbing or straw. The variety of seat finishes gives this object a unique adaptability.

Maintenance

Clean with non-corrosive, non-abrasive cleaners to ensure the longevity and pristine appearance of aluminium surfaces. Avoid the use of scrubs pads or pressure cleaners, as these may cause damage.

Finishes
