

# Philia Sofa Collection

Design Rodolfo Dordoni

Technical Information

Philia is the new collection of outdoor sofas designed by Rodolfo Dordoni. Distinctive elements such as the generous dimensions, modularity and teak are clear references to the yachting world. The perimeter frame works both as a support for the backrests and as a tabletop, alternating with the comfortable seating. The backrests and armrests of Philia are lightly padded and can recline in three positions, increasing the possible variations. The armrest can also be used as a backrest or headrest: formal versatility, relaxation and great comfort. The supporting structure is the carabottino, the wooden grating typically used in yachts, the soul of this living furniture proposal in certified natural teak wood, which develops from the coffee table to the seats and outdoor sofa, up to more generous dimensions for the double chaise longue.
