

Teka 173 Table

Design Gordon Guillaumier

Technical Information

TEKA spotlights all the expressive force of teak, a wood whose high value is equally matched by its malleability, in a complete collection of outdoor sofas and low tables, dining tables and chairs. Designed by Gordon Guillaumier, TEKA is developed around a particular prism-shaped geometric construction of great impact which, at the same time, confers a sensation of lightness to the product, while retaining its intrinsic durability. The tops of the outdoor tables are in stoneware slates, with elegant opaque natural tones or vibrant glossy colours.
