

Large dining table.

The **structure** is made of matt or gloss varnished stainless steel in all of the colours in the collection and is provided with adjustable stainless steel and rubber spacers.

The **top** is made of thermo-treated ash, that is, subjected to a completely ecological manufacturing process that increases its dimensional stability, makes it suitable for outdoor use and gives it particular shades of colour. Composed of panels arranged side by side in a longitudinal direction, the top is processed in such a way as to follow the rounded profile of the upper part of the supporting structure of the table.
