

Series of pouf available in different dimensions with removable cover made by hand weaving element in tubular knit.

The natural materials featured in the Eres collection can be used outdoors, but not be directly exposed to the elements, and require some extra attention and care than traditional outdoor furniture. These products need to be used under a stable cover and to be protected overnight. It is also recommended that they are sheltered indoors for seasonal protection. Some of the materials will mature and will change appearance and colour over time. And this will naturally happen.

Padding: polypropylene microspheres, insert in expanded polyurethane covered with water repellent fabric; fixed cover in three dimensional 100% polyester fabric.

Only for the poufs code B158CE, B158EE and B158FE: base in varnished stainless steel AISI 304, plastic spacers.

Upholstery: Chain lino (linen) tubular knit padded with paineira vegetable fiber.

Notes:

The paineira vegetable fiber is water repellent, non-allergenic and completely biodegradable.

The product can be used also in interior environments.

We advise to use a Winter Set protection cover.
